Chemical Management & MSDS Guide

Department: Chemical Store

Storage Rules:

- Store chemicals in a cool, dry, well-ventilated area.
- Keep acids and bases separated.
- Use secondary containment (drip trays) to prevent spills.
- Label all containers with chemical name and hazard symbols.

MSDS (Material Safety Data Sheet) Requirements:

- Every chemical must have an MSDS available at the storage area.
- MSDS must include: chemical name, hazards, first aid, storage, disposal.

PPE for Chemical Handling:

- Gloves (nitrile or rubber), safety goggles, apron, and mask.

Spill Response:

1. Evacuate the area.
2. Wear PPE.
3. Contain the spill with absorbent material.
4. Dispose of contaminated material as hazardous waste.
