# Factory Employee & Salary Overview

Department: HR & Training

Purpose and scope

This document summarizes publicly reported workforce indicators and explains how to verify factory-specific payroll and statutory benefits. It is for demonstration and general information only; it is not a payroll record, legal opinion, or representation of any particular factory.

## H&M Group workforce indicators (2025)

- Average employees, measured as full-time equivalents: 94,744.

- Markets: 81.

- Stores: 4,101 (approximately 4,100).

- Women in senior management: 51%.

These are global H&M Group figures, not Bangladesh garment-factory headcount, wages, or payroll data.

## Bangladesh salary and benefits: verification note

The draft figures supplied for this document state a BDT 12,500 monthly wage alongside components of BDT 7,400 basic pay, BDT 3,700 house rent, BDT 750 medical allowance, and BDT 1,700 transport/food allowance. Those components add up to BDT 13,550, not BDT 12,500. The stated grade and breakdown therefore should not be represented as a verified wage schedule.

Overtime multipliers, working-hour limits, maternity entitlements, and festival holidays depend on the current law, amendments, wage gazettes, and applicable factory policy. The supplied claim of a 2026 amendment and 1.5x overtime was not confirmed from an authoritative current source during preparation, so this overview does not assert those figures. HR teams should consult the current official gazette, the Bangladesh Labour Act as amended, and the factory’s approved wage schedule before advising employees or processing payroll. Individual amounts can also vary by grade, role, attendance, and applicable allowances.
